- He is a great professor but the material is difficult to understand. The textbook is a little confusing but the lecture videos helps understand the PowerPoints a little bit. Using simpler terms and giving examples helps a lot.
- Great professor, hard subject. I do not like how our grade was based solely on discussion posts and the exams. It was also difficult to get a good grade on the discussion because it was based on participation. Only top contributors made A's. This negatively effected my grade.
